Art Unit: 3723

Claims 1, 3, 11, 13, 19 and 21-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for the present claim recitation that the end groove 53 of Figure 5 can be combined with the Figure 8 embodiment that has a spiral groove. Hence, the claim recitation of a "spiral groove" AND an "end portion groove" is NEW MATTER.

Claims 1, 3, 11, 13, 19, and 21-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. One skilled in the art would be unable from this faulty disclosure to ascertain how to use a groove as a one or more mechanisms for attaching a plurality of wire or cable engaging attachments to the end portion of the fish tape. It is noted that the disclosure on page 6 states that in one of the embodiments "groove 53 provides a mechanism for attaching a plurality of wire or engaging attachments to the end portion of the fish tape". The use of groove 53 for such a purpose is inadequately disclosed. How is anything attached to groove 53? Further, there is no disclosure that the groove 53 of Figure 5 can be used with a fish tape having the continuous spiral groove of Figure 8. No drawings show the combination of the Figure 5 groove with

Art Unit: 3723

the spiral groove of Figure 8. It is not understood how end groove (53) of Figure 5 interacts with the spiral groove of Figure 8.

Claims 1, 3, 11, 19, and 21-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the independent claims the "one or more mechanisms for attaching a plurality of wire or cable engaging attachments to the end portion of the fish tape" is not understood. Further, it is not understood how end groove (53) interacts with the spiral groove.

Claims 4-10 and 14-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/21/05.

Applicant's remarks have been given careful consideration. In the previous Office action the examiner asked, "How is anything attached to groove 53?" Applicant's communication of 1/10/07 choose not to address the examiner's question.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3723

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
